We are Shatterproof

We believe that no one should experience suffering or loss due to substance use disorder, a medical condition that is preventable and treatable for everyone, regardless of background or identity.

We guide society through the complexities of addiction.

We inform the public on prevention, treatment, and recovery from addiction.

We mobilize the public to end the stigma of addiction.

Addiction is one of the largest public health crises impacting the United States.

Addiction costs our country billions of dollars each year, and the costs keep rising.

With the science and evidence we have today, we could reduce the costs and save countless lives by increasing access to addiction treatment with an approach that's compassionate, evidence-based, and rooted in public health.

- Nearly **49 million** Americans with a substance use disorder (SUD), and 152 million Americans know someone with an SUD.
- **3 million** Americans have an opioid use disorder, and millions more are at risk of fatal overdose.
- A SUD is the **leading preventable** cause of death in the U.S.
- **93,000** fatal overdoses in 2023.
- **140,000** Americans die from alcohol-related causes annually.
- **Fewer than 10%** of individuals with an SUD receive treatment, fewer receive evidence-based treatment.

Shatterproof's mission is driven by three pillars of work

Transforming Treatment

We're changing the healthcare system by providing universal access to proven evidence based treatment. A cornerstone of the approach is the Shatterproof Treatment Atlas, an online tool that simplifies the search for quality care, empowering individuals to find the support they need.

Ending Stigma

We're shifting knowledge and attitudes to remove the stigma that surrounds substance use disorder, a medical condition that impacts families and communities everywhere.

Shatterproof has created a national plan and research tool to address this pervasive issue that focuses on six systems - employers, healthcare, government, criminal justice, media and entertainment, and local communities - capable of effectively reducing stigma.

Educating and Empowering Communities

Shatterproof supports millions of individuals impacted by addiction through advocacy, education, and community-building efforts. Tens of thousands participate in events annually to connect, raise awareness and funds. Shatterproof offers addiction education through online tools to millions. Volunteer ambassadors across the country promote Shatterproof initiatives in their communities and share their personal experiences with addiction.

Shatterproof's advocacy is leading the charge in shaping policies and transforming the treatment system, while championing efforts to end stigma and educate families.

Together, with our stakeholders and supporters, we are shaping a future where every individual with SUD can thrive.

Join us in shaping a healthier today and tomorrow.

Support Shatterproof's mission by contributing your time, talent, or resources, participating in events, sharing your story, or honoring the memory of a loved one.
